

KL-0121-38 B FUEL LINE PLIERS

KN 9.64

Universally applicable to quick-release couplings as found on fuel lines in vehicles from VW-Audi, SEAT, ŠKODA, Mercedes, BMW, Renault, Peugeot, Opel/Vauxhall, Chrysler, Fiat etc.

Allows you to unlatch quick-release couplings on fuel lines professionally. An indispensable tool when changing the fuel filter or performing repairs to the fuel system for example.

Today's fuel lines generally feature quick-release couplings having very small release lugs. The use of conventional pliers is not appropriate, since the size of the clamping jaws is simply too large to fit these lugs. The adjustable fuel line pliers from GEDORE Automotive is the perfect solution here - the ingenious design of the pliers' gripping jaws, which can be swivelled by up to 90 degrees, allows even hard-to-reach couplings to be released without any damage.

Technical Data:

Swivel range:	90°
Length:	172mm
