# TRACK ROD ADJUSTMENT TOOL

**Universally suitable for track rods with tube Ø of approx. 11 to 23mm as found in passenger cars.**

Designed to facilitate the loosening and adjustment of stiff track rods with tube Ø of approx. 11 to 23mm as found in passenger cars. Thanks to the detachable tube handle, the tool length can be reduced from 420 to 250mm. This allows for convenient working even in confined space conditions in the wheel arch. The broad serrated jaws are designed to prevent damage to the track rod.

Made in Germany

### Example of use:

By inserting the adapter into the adjustment tool, it is also suitable for thinner track rods with a diameter of approx. 11 mm.

### Technical Data:

For track rod tube Ø:	approx. 11-23mm
Overall length:	420mm
Length without tube handle:	250mm
